PRECISION AUDIO

QTC1 & Sigma 6.2

Fred Hersch is one of the foremost Jazz artists in the world and a respected producer. He knows the sound of his instruments and uses QTC1 40 kHz microphones to capture it. Earthworks Sigma 6.2 monitors are his reference.

"I use my QTC1s on every session. They are extremely musical, balanced from top to bottom, accurate, but not clinical and incredibly lifelike."

"The Sigma 6.2 is my reference! They reveal every detail with really incredible honesty!"

"Both as a producer and a pianist, I rely on Earthworks. They have become a vital part of my recording process."
